SERVICE AND REGULATORY ANNOUNCEMENTS.

BUREAU OF ANIMAL INDUSTRY.

NOVEMBER, 1923.

[This publication is issued monthly for the dissemination of information, instructions, rulings, etc., concerning the work of the Bureau of Animal Industry. Free distribution is limited to persons in the service of the bureau, establishments at which the Federal meat inspection is conducted, public officers whose duties make it desirable for them to have such information, and journals especially concerned. Others desiring copies may obtain them from the Superintendent of Documents, Government Printing Office, Washington, D. C., at 5 cents each, or 25 cents a year. A supply will be sent to each official in charge of a station or branch of the bureau service, who should promptly distribute copies to members of his force. A file should be kept at each station for reference.]

NOTICES REGARDING MEAT INSPECTION.

APPROVAL OF LABELS AND OTHER MARKINGS ON MEAT AND PRODUCTS.

In continuation of the steps recently taken with the view to simplifying the approval of labels and other markings on meat and products, the following procedure supplementing that outlined in Service and Regulatory Announcements of August and October, 1923, is authorized:

The approval of markings such as labels (including craft sheets), stencils, and box dies, applied to shipping containers, may be considered as being in blanket form with reference to the number, size, and description of the units contained in such shipping containers. For example, the approval of a label bearing the statement "2 Doz. Tins No. 1" authorizes the use of a duplicate or proportionately enlarged label bearing the statement "12 Jars No. 2," "12 Medium Pails," "Six Large Pails," etc.

The substitution on labels and other markings of such abbreviations as "lbs." in lieu of "pounds," "ozs." in lieu of "ounces" "est." in lieu of "establishment," the addition or omission of the letters "U. S. A.," and the application of such qualifications as "Contents," "Minimum weight," "Not less than," etc., in addition to the figures denoting the weight or in substitution for other qualifications pertaining to the weight, do not necessitate independent approval of materials. Conversely, the substitution of the complete word "pounds," "ounces," or "establishment" in lieu of the abbreviation, the omis-

sion of all qualifications in connection with the weight, or the substitution of the words "Net weight" in lieu of such qualifications as "Minimum weight," etc., do not require independent approval. It should be understood, however, that this does not apply to the omission or addition of the statement of weight as a whole, and therefore the approval of labels which do not bear the statement of weight does not authorize the use of labels on which the statement of weight is applied, since it is essential for the bureau to pass upon the location and prominence of this feature.

When any of the unessential qualifications above referred to are applied to labels or other materials they shall be so located as not to obscure the establishment number or encroach on the inspection legend or the name of the product.

The correction of labels by obliterating the statement of weight or any other features requires independent submission of such corrected materials for approval.

M. I. FORMS 124-B AND 124-BB.

A recent survey discloses that M. I. Forms 124-B and 124-BB revised are not desired by many of the establishments. Inspectors in charge are therefore directed to render these forms only to such establishments as request them.

AMENDMENT TO FISCAL REGULATIONS.

TRAVELING EXPENSES.

By memorandum No. 457 of the Office of the Secretary, effective July 16, 1923, paragraph 33 (k) of the Fiscal Regulations of the department is amended to read as follows:

33. *Actual traveling expenses.*

(k) When specifically authorized actual operating expenses (gasoline and oil), or mileage rates not exceeding 3 cents per mile for a motor cycle and 7 cents per mile for an automobile, for the use of personally owned vehicles in official work. Each account covering actual operating charges or mileage rates should be supported by a certificate setting forth (a) date of travel, (b) points between which performed, (c) actual number of miles traveled, (d) hour of departure from and arrival at official station, (e) that the distances stated are to the best of the employee's knowledge and belief correct and that no public or regular means of transportation could be used as advantageously in the interest of the Government. Certificates covering actual operating charges should indicate in addition (f) that the charges for gasoline and oil were arrived at by actual measurement at both the beginning and end of the official trip, and those covering mileage rates should show (g) the rate per mile and total charge. In addition to actual operating expenses (gasoline and oil), employees using their own vehicles in official work may be reimbursed for storage charges when storage becomes

necessary at points other than official headquarters, and necessary tolls and ferry charges. Where it becomes necessary, by reason of breakdowns, impassable roads, or miring to have vehicles towed partly, or under extraordinary circumstances, entirely to destination, reimbursement may be made for reasonable expense of such towage, but all such charges must be fully explained and each case will be considered on its merits. Employees operating personally owned vehicles on a mileage basis will not be reimbursed in addition for storage, tolls, ferry or towage charges.

AUTOMOBILE EQUIPMENT.

In order to secure uniformity of equipment and to reduce correspondence, the following accessories are considered standard equipment for bureau-owned automobiles and may be purchased under letter of authorization: Locks to prevent theft of car or extra tires, speedometer, tool box, nonskid chains, mirror, wind-shield cleaner, radiator and hood covers, and carrier for extra tire.

Contemplated purchases of other accessories or additional equipment, not as replacements of equipment ordinarily furnished with the particular car when new, should be referred to the Washington office for approval.
